Item 8.01 Other Events.

On May 13, 2019, GulfSlope Energy, Inc. (“GulfSlope”) provided an updated press release on the drilling activities on the Tau Prospect on Ship Shoal Blocks 336 and 351, in the Gulf of Mexico Outer Continental Shelf. As noted in our Form 8-K filing on April 30, 2019, as of such date, Texas South Energy, Inc. (the “Company”) had received a Default Notice and Demand for Payment under the terms of its joint operating agreement with GulfSlope and Delek GOM Investments, LLC in the amount of \$2,870,183.11 as of April 18, 2019. The operating agreement grants a lien and security interest on the Company’s interest in the leases comprising the Tau Prospect, and grants to the operator the right to pursue foreclosure of the lien and security interest. In addition, as a result of the Default Notice, the Company has not been receiving well information since the date of the original notice. In the GulfSlope press release, GulfSlope stated that “[p]roducible hydrocarbon zones were not established to the current depth, but hydrocarbon shows were encountered” and “the Company has elected to abandon this well in a manner that would allow for re-entry at a later time.”
